Publishing, Advertising and Subscriptions Offices

Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK (Tel (+1865) 843000; Telex 83177; Fax (+1865) 843010).

Frequency: Published semi-monthly (two issues per month, two volumes 1995)

Copyright © 1995 Elsevier Science Ltd

Subscription Information

Annual Institutional Subscription Rates 1995: North, Central and South America, US $1602, Rest of World, £1075. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA and from the Rest of the World to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK Subscription rates for Japan are available on request.

Back Issues: Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1990–1994. Earlier issues are available in high quality photo-duplicated copies as complete volumes only. Back volumes on microfilm are available from UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, USA.

Second-class postage paid at Newark, NJ and additional mailing offices. Postmaster send address corrections to Nonlinear Analysis, Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA.

Volume Contents

Volume 24 Number 1

R. DALMASSO	1	Symmetry properties in higher order semilinear elliptic equations
H. XIE	9	$L^{2,\mu}(\Omega)$ estimate to the mixed boundary value problem for second order elliptic equations and its application in the thermistor problem
L. A. PELETIER and H. C. SERAFINI	29	A very singular solution and other self-similar solutions of the heat equation with convection
K. ITO and F. KAPPEL	51	Approximation of semilinear Cauchy problems
CH. G. PHILOS and I. K. PURNARAS	81	Asymptotic behavior of solutions of second order nonlinear ordinary differential equations
Y. TAKEUCHI and Z. LU	91	Permanence and global stability for competitive Lotka–Volterra diffusion systems
J. HASLINGER and P. D. PANAGIOTOPOULOS	105	Optimal control of systems governed by hemivariational inequalities. Existence and approximation results
F. BETHUEL	121	Approximations in trace spaces defined between manifolds

Volume 24 Number 2

S. ROY CHOUDHURY	131	General similarity reductions of a family of Cahn–Hilliard equations
M. A. KATSOULAKIS	147	A representation formula and regularizing properties for viscosity solutions of second-order fully nonlinear degenerate parabolic equations
JIE JIANG	159	On radially symmetric solutions to singular nonlinear Dirichlet problems
ZHANG JIAN	165	Finite-time behaviour of solutions to nonlinear Schrödinger evolution equations

D. Bahuguna	175	Quasilinear integrodifferential equations in Banach spaces
Wei Li and He Zhen	185	The applications of sums of ranges of accretive operators to nonlinear equations involving the P-Laplacian operator
Xing-Bin Pan	195	Condensation of least-energy solutions: the effect of boundary conditions
Hong-Kun Xu and Xi-Ming Yin	223	Strong convergence theorems for nonexpansive nonself-mappings
A. Jourani and L. Thibault	229	Metric regularity for strongly compactly Lipschitzian mappings
A. K. Ben-Naoum and J. Berkovits	241	On the existence of periodic solutions for semilinear wave equation on a ball in $\mathbb{R}^n$ with the space dimension n odd
A. Ashyralyev	251	Well-posed solvability of the boundary value problem for difference equations of elliptic type
A. Ashyralyev and P. E. Sobolevskii	257	Well-posed solvability of the Cauchy problem for difference equations of parabolic type
J. V. A. Gonçalves and O. H. Miyagaki	265	Three solutions for a strongly resonant elliptic problem
R. Zhang and J. Treiman	273	Upper-Lipschitz multifunctions and inverse subdifferentials

Volume 24 Number 3

Yuanji Cheng	287	On the existence of radial solutions of a nonlinear elliptic equation on the unit ball
N. A. Bobylev	309	On a problem of S. Ulam
P. Diamond, P. Kloeden and A. Pokrovskii	323	Analysis of an algorithm for computing invariant measures
E. N. Dancer and Y. Du	337	Positive solutions for a three-species competition system with diffusion—I. General existence results
E. N. Dancer and Y. Du	359	Positive solutions for a three-species competition system with diffusion—II. The case of equal birth rates
H. Takamura	375	Blow-up for semilinear wave equations in four or five space dimensions
S. G. Bartels, L. Kuntz and S. Scholtes	385	Continuous selections of linear functions and nonsmooth critical point theory

D. G. Costa and C. A. Magalhães	409	Existence results for perturbations of the p-Laplacian
A. Elcrat and O. Nicolio	419	An iteration for steady vortices in rearrangement classes
Ming Jiang	433	Partial regularity of weakly stationary harmonic maps into a manifold with symmetries

Volume 24 Number 4

V. Dolezal	441	Optimization of general nonlinear input–output systems
A. G. Kartsatos and Xiaoping Liu	469	Nonlinear equations involving compact perturbations of m-accretive operators in Banach spaces
J.-M. Rakotoson	493	Relative rearrangement for highly nonlinear equations
Ph. Laurençot	509	On a nonlinear Schrödinger equation arising in the theory of water waves
D. M. Cao	529	Eigenvalue problems and bifurcation of semilinear elliptic equation in $\mathbb{R}^N$
Junyu Wang	555	Solvability of singular nonlinear two-point boundary value problems
D. Noll	563	Second order epi derivatives and the Dupin indicatrix for nonsmooth functions
S. Ruan	575	The effect of delays on stability and persistence in plankton models
X. Ren and J. Wei	587	Asymptotic behavior of energy solutions to a two-dimensional semilinear problem with mixed boundary condition
Zheng Zuo-Huan	605	On the limit cycles for a class of planar systems

Volume 24 Number 5

Zhao Junning	615	The Cauchy problem for $u_t = \operatorname{div}(\lvert u\rvert^{p-2} u)$ when $2N/(N+1) < p < 2$
Li Yong and Lin Zhenghua	631	Periodic solutions of differential inclusions

L. FAINA and A. SALVADORI	643	Existence theorems for optimal control problems in hereditary structures
GE WEIGAO and R. O. WEBER	655	Comparison theorems of reaction–diffusion equations and their applications
A. FONDA	667	Periodic solutions for a conservative system of differential equations with a singularity of repulsive type
DAOYUAN FANG	677	The Cauchy problem for nonlinear hyperbolic equations with discontinuous data
J. DYSON and R. VILLELLA-BRESSAN	693	On integral solutions on nonautonomous delay equations and their propagation
F. S. DE BLASI, G. PIANIGIANI and V. STAICU	711	Topological properties of nonconvex differential inclusions of evolution type
T. GRAMCHEV	721	Entropy solutions to conservation laws with singular initial data
SHUNIAN ZHANG	735	Invariance principle for autonomous delay difference systems
S. A. VAVILOV	747	A method of studying the existence of nontrivial solutions to some classes of operator equations with an application to resonance problems in mechanics
R. KUMAR and T. G. BHASKAR	765	m-Accretivity of the differential operators with an interface
N. TANAKA	773	Semilinear equations in the "hyperbolic" case

Volume 24 Number 6

A. HEIBIG and M. MOUSSAOUI	789	Generalized and classical solutions of nonlinear parabolic equations
G. COLOMBO and V. V. GONCHAROV	795	Existence for a nonconvex optimal control problem with nonlinear dynamics
E. A. GALPERIN and V. V. RUMYANTSEV	801	Stability analysis for sets of solutions
J. E. MUÑOZ RIVERA	825	Existence and decay of weak solutions for systems arising in thermodynamics
A. CANINO and U. PERRI	839	Constrained problems in Banach spaces with an application to variational inequalities

L. S. Hou and J. S. Peterson 857 Boundary optimal control for an electrically conducting fluid using boundary electrical potential controls

A. Novick-Cohen and M. Grinfeld 875 Counting the stationary states of the Sivashinsky equation

M. Studniarski and V. Jeyakumar 883 A generalized mean-value theorem and optimality conditions in composite nonsmooth minimization

J. W. Reyn and R. E. Kooij 895 Infinite singular points of quadratic systems in the plane

Pei-Kee Lin, Kok-Keong Tan and Hong-Kun Xu 929 Demiclosedness principle and asymptotic behavior for asymptotically nonexpansive mappings

I. Schindler 947 A critical value function and applications to semilinear elliptic equations on unbounded domains

Volume 24 Number 7

H. Wang and Y. Li 961 Periodic solutions for Duffing equations

Lei Deng and Xieping Ding 981 Iterative approximation of Lipschitz strictly pseudocontractive mappings in uniformly smooth Banach spaces

Zheng Xiyin 989 The normalized duality mappings of Banach spaces

M. Koike 997 Volevič systems of singular nonlinear partial differential equations

D. Passaseo 1011 Some concentration phenomena in degenerate semilinear elliptic problems

Li Yong, Lu Xiguan and Su Yi 1027 A homotopy method of finding periodic solutions for ordinary differential equations from the upper and lower solutions

J. A. Iaia 1039 A priori estimates for a semilinear elliptic PDE

E. Landesman, S. Robinson and A. Rumbos 1049 Multiple solutions of semilinear elliptic problems at resonance

H. Inoue and M. Ôtani 1061 Strong solutions of initial boundary value problems for heat convection equations in noncylindrical domains

R. Rautmann 1081 H^2-convergence of Rothe's scheme to the Navier–Stokes equations

Pei-Kee Lin 1103 Unrestricted products of contractions in Banach spaces

A. M. Candela and M. Lazzo 1109 Positive solutions for a mixed boundary problem

G. WOLANSKY 1119 Comparison between two models of self-gravitating clusters: conditions for gravitational collapse

Volume 24 Number 8

BOPENG RAO 1131 Marguerre–Von Kármán equations and membrane model

A. M. KRASNOSEL'SKII and J. MAWHIN 1141 On some higher order boundary value problems at resonance

J. DOLBEAULT and F. POUPAUD 1149 A remark on the critical explosion parameter for a semilinear elliptic equation in a generic domain using an explosion time of an ordinary differential equation

P. BERNHARD and A. RAPAPORT 1163 On a theorem of Danskin with an application to a theorem of Von Neumann–Sion

SHIGEO KATO and MASATO IMAI 1183 On the existence of periodic solutions and almost periodic solutions for nonlinear systems

G. LU 1193 Global existence and blow-up for a class of semilinear parabolic systems: a Cauchy Problem

SONG JIANG 1207 Asymptotic stability of shearing flows of incompressible thermoviscous fluids

A. C. BIAZUTTI 1221 On a nonlinear evolution equation and its applications

N. C. APREUTESEI 1235 A boundary value problem for second order differential equations in Hilbert spaces

TAKESHI ISOBE 1247 Convergence result for the weak solutions of nonlinear elliptic systems

NGUYEN THANH LONG and A. PHAM NGOC DINH 1261 A semilinear wave equation associated with a linear differential equation with Cauchy data

YONG-ZHUO CHEN 1281 Fixed points of T-monotone operators

J. J. NIETO and HONG-KUN XU 1289 Solvability of nonlinear Volterra and Fredholm equations in weighted spaces

Volume 24 Number 9

L. VESELÝ 1299 Local uniform boundedness principle for families of ε-monotone operators

QINGXIN ZHU and N. U. AHMED 1305 Some results on parabolic equations in Banach space

C. SINESTRARI 1321 Semiconcavity of solutions of stationary Hamilton–Jacobi equations

KIN MING HUI 1327 Singular limit of solutions of the generalized p-Laplacian equation

LU-CHUAN ZENG 1347 On the existence of fixed points and nonlinear ergodic retractions for Lipschitzian semigroups without convexity

A. D. DROZDOV, V. B. KOLMANOVSKII, P. NISTRI and P. ZECCA 1361 Stability of nonhomogeneous aging viscoelastic bodies under dynamic loading

R. K. GEORGE 1377 Approximate controllability of nonautonomous semilinear systems

Y. YAMADA 1395 Global solutions for quasilinear parabolic systems with cross-diffusion effects

YAN ZIQIAN 1413 A note on the solvability in $W^{2,p}(\Omega)$ for the equation $-\Delta u = f(x, u, Du)$

Volume 24 Number 10

S. KANDA 1417 Existence theorem of solutions to $u'(t) = Au(t)$ for A weakly closed and its applications

HUIJIANG ZHAO, CHANGJIANG ZHU and ZHONG YU 1435 Existence and convergence of solutions to a singularly perturbed higher order partially differential equation

KOK-KEONG TAN, JIAN YU and XIAN-ZHI YUAN 1457 Some new minimax inequalities and applications to existence of equilibria in H-spaces

M. SCHECHTER 1471 Bounded resonance problems for semilinear elliptic equations

C. P. GUPTA 1483 A second order m-point boundary value problem at resonance

A. DEBUSSCHE and L. DETTORI 1491 On the Cahn–Hilliard equation with a logarithmic free energy

N. A. BOBYLEV, YU M. BURMAN and S. A. SOLOVIEV 1515 Error bounds for Galerkin procedures

Volume 24 Number 11

G. CERAMI and D. PASSASEO 1533 Existence and multiplicity results for semilinear elliptic Dirichlet problems in exterior domains

SEHIE PARK	1549	Acyclic maps, minimax inequalities and fixed points
Y. ZHANG and ZHANG YI	1555	Stability of nonlinear analytic integrodifferential equations
P. COLLI	1565	Global existence for the three-dimensional Frémond model of shape memory alloys
V. ANURADHA and R. SHIVAJI	1581	Sign changing solutions for a class of superlinear multi-parameter semi-positone problems
J. FILO and J. KAČUR	1597	Local existence of general nonlinear parabolic systems
YIN JINGXUE and LI YONG	1619	Classical radial solutions for singular and degenerate elliptic equations
V. LAKSHMIKANTHAM, S. LEELA and F. A. MCRAE	1627	Improved generalized quasilinearization (GQL) method
L. BOCCARDO, M. ESCOBEDO and I. PERAL	1639	A Dirichlet problem involving critical exponents

Volume 24 Number 12

JIAXING HONG	1649	The global smooth solutions of Cauchy problems for hyperbolic equation of Monge–Ampere type
YIMING LONG	1665	Nonlinear oscillations for classical Hamiltonian systems with bi-even subquadratic potentials
M. TSUTSUMI	1673	Convergence of singularly perturbed nonlinear hyperbolic systems
S. HU, V. LAKSHMIKANTHAM and N. S. PAPAGEORGIOU	1683	On the properties of the solution set of semilinear evolution inclusions
K. J. BROWN and F. A. DAVIDSON	1713	Global bifurcation in the Brusselator system
J.-B. HIRIART-URRUTY, M. MOUSSAOUI, A. SEEGER and M. VOLLE	1727	Subdifferential calculus without qualification conditions, using approximate subdifferentials: a survey
C. Y. CHAN and P. C. KONG	1755	Solution profiles beyond quenching for degenerate reaction–diffusion problems
	I	Title Page, Volume Contents and Author Index, Volume 24, 1995
